JetBrains Mission

To apply advanced technologies in the software development industry, and to provide the software market with most intelligent tools that help developers and users of such software work faster, better and more efficiently than ever before.

About JetBrains

In February 2000, JetBrains, s.r.o. was founded by three engineers with years of front-line experience in the programming industry. Since the launch of its first product, IntelliJ IDEA, JetBrains has been recognized by industry leading media figures and development professionals for its brilliant innovations in the Java development tools market.

Today, JetBrains is a technology-leading software development company with an international presence and rapidly surging annual sales. Headquartered in Prague, Czech Republic, JetBrains maintains two research and development laboratories, one in St. Petersburg, Russia and the other in Boston, Massachusetts USA, plus three sales and support offices in North America. JetBrains restricts its teams to high-level professionals with rich experience developing for world-class companies in a diverse array of software development projects.

Since introducing its award-winning IntelliJ IDEA, JetBrains has been dedicated to creating highly intelligent, easy-to-use, up-to-date productivity-enhancing tools for software development professionals, with an emphasis on the advancement of software development technologies.

Market Position

Customers

JetBrains, dedicated to delivering intelligent tools that help users work faster and more efficiently, has become a trusted source of technology-leading information and development tools. The company's flagship IntelliJ IDEA Java IDE is used by more than 3,000 companies around the world, including:

- American Express
- Bank Of America
- Cisco Systems
- Citigroup
- Ford
- FREDDIE MAC/MERRI-FIELD WHSE
- Hewlett-Packard Company
- GE Medical Systems
- Lockheed Martin
- Northrop Grumman
- Verizon
- Walt Disney World
Etc.

Fortune 500

- Agilent Technologies, Inc.
- Allegheny Energy Supply
- Conseco
- DTE Energy
- EMC
- Fannie Mae
- First Data Corporation
- Humana
- Oracle
- Raytheon Company
- Sun Microsystems
- Tribune Interactive
- Xerox Corporation
Etc.

More than 3000 companies, including more than 100 of the top Fortune 500 firms, spanning over 70 countries, now put their trust in JetBrains. They represent such diverse industries as finance & banking, automotive, biotechnology, enterprise system software development, IT infrastructure manufactures, mobile handset makers, fossil fuel & petroleum energy, and much more. Additionally, JetBrains tools are used by universities all over the world to help simplify teaching and to encourage improved methodologies and practices in object-oriented programming.

The JetBrains' flagship product, IntelliJ IDEA, is nearing its sixth generation. It has over 60,000 licensed users and continues to solidify its position as the most innovative, most usable and most intelligent IDE on the Java development tools market.

JetBrains' ReSharper is a powerful C# development tool that extends Microsoft's Visual Studio .NET functionality. Released in July 2004, ReSharper quickly gained popularity on the C# development market and has acquired thousands of licensed customers up to date.

A new profiler for .NET applications – JetBrains dotTrace – released in July 2005, has gained wide recognition as one of the easiest, fastest and most efficient applications of its kind.

With its ever growing cumulative experience and its high innovative potential, JetBrains continues its research in the software development field as it advances cutting-edge technologies in the course of developing new software tools. Ultimately, JetBrains will not compromise its goal of ensuring that its motto, "Develop with pleasure!" remains true.

“OPEN IDEA” Development Philosophy:

In a constantly developing market, it is vital to listen to and interact directly with end users, in order to create the intelligent tools that people need and want to use. The rapid acceptance of JetBrains and its software solutions is partly due to the “Open Idea” development philosophy embraced by the company's three founders. That philosophy is reflected in the company's unique early-access program (EAP), which permits rapid response to user comments and requests. It results in a rolling upgrade process in which new features and functionalities are incorporated steadily, instead of accumulated and released as discrete versions. The process culminates in periodic “point” version number releases. These are analogous to “freezing further development pending release” in an open source development.

Users of JetBrains solutions have come to trust this rapid responsiveness and become willing contributors to the entire product line. All JetBrains products are community-driven – but they never lose the market advantages of proprietary code. As a result of this philosophy, JetBrains' solutions “think” like their users and dramatically boost user productivity.

Timeline

2008

June

- ReSharper 4.0 released

2007

December

- TeamCity 3.0 released

October

- IntelliJ IDEA 7.0 released

May

- dotTrace 3.0 released

April

- TeamCity 2.0 released

January

- TeamCity 1.2 released

2006

- TeamCity 1.0 and IntelliJ IDEA 6.0 released
- IntelliJ IDEA 5.1 localized for Japanese
- Companion Products program launched

2005

- JetBrains TMate 2.0 released
- Omea Pro 2.0 released
- IntelliJ IDEA 5.0 released
- JetBrains dotTrace released
- ReSharper 1.5 released

2004

- Omea Pro 1.0 released
- ReSharper 1.0 released
- IntelliJ IDEA 4.5 released
- IntelliJ IDEA 4.0 released
- New office opened in Boston

2003

- JetBrains opens offices in New Jersey and California

2002

November

- IntelliJ IDEA 3.0 released

2001

- IntelliJ IDEA 2.0 released
- IntelliJ IDEA 1.0 released

2000

- IntelliJ CodeSearch released
- IntelliJ Renamer released

JetBrains Solutions

JetBrains IntelliJ IDEA

The industry's smartest, most user-friendly and code-centric Java Integrated Development Environment, IntelliJ IDEA is a comprehensive development environment recognized by many as the superior Java IDE in the market. With its industry-leading features, IntelliJ IDEA provides a robust combination of enhanced development tools, including: intelligent coding assistance and automation, advanced refactoring, JEE and web development support, version control, Ant, Maven, TestNG and JUnit integrations, unparalleled code analysis, innovative Spring and Hibernate integrations, and JDK 1.5 features support. IntelliJ IDEA enables Java programmers to remarkably boost their productivity.

JetBrains ReSharper

A powerful add-in for Visual Studio .NET, JetBrains ReSharper brings intelligent C# and VB.NET code editing and coding assistance features to Visual Studio. ReSharper aims to provide C#/VB.NET developers with the same level of power and productivity enhancements that have been available to Java developers using IntelliJ IDEA. A rich set of its code analysis, code automation and refactoring features make coding in C#/VB.NET a real pleasure.

JetBrains dotTrace

dotTrace is an efficient, easy to use CPU and memory profiler for hunting down performance bottlenecks in applications written for Microsoft's .NET® platform. dotTrace profiles .NET Framework 1.1, 2.0, 3.0 and 3.5 applications and Windows services including ASP.NET applications running on Internet Information Server. Convenience and ease of use set dotTrace Profiler apart from the many profiling tools built for the Microsoft .NET platform. The friendly program interface provides effective navigation, easy filtering, smart search options and a handy source preview. With its unparalleled speed and efficiency dotTrace decisively outperforms the great majority of its in-class competitors.

JetBrains TeamCity

TeamCity is an innovative platform-independent solution for improving the productivity and collaboration of both Java and .NET development teams. It automates and coordinates software building and testing – the key daily processes of any software development business. It has convenient Web UI and integrates with the most popular IDEs of today (IntelliJ IDEA, Eclipse and NetBeans). TeamCity has flexible licensing options: Professional edition, distributed free of charge, targets smaller size teams, while the Enterprise edition suits larger teams and brings advanced features such as higher security and an unlimited number of users.

JetBrains Management Team:

Sergey Dmitriev

Co-Founder, Chief Executive Officer

Sergey Dmitriev holds an MS in mathematics and brings over seventeen years of real-world development and entrepreneurial experience to the JetBrains management team. Prior to co-founding JetBrains, he led the development of key projects at TogetherSoft as a project manager and core developer. In 1993, before joining TogetherSoft, Sergey was co-founder and CTO of GIS software company Horis, Ltd.

Valentin Kipiatkov

Co-founder, Chief Technology Officer, Chief Scientist

Valentin holds an MS in mathematics and brings to JetBrains more than ten years of professional experience in mathematics and computer science-related fields. Before co-founding JetBrains, he headed key teams as a lead developer and system architect at TogetherSoft. Prior to that, Valentin led a team devoted to research and development of CPU instruction set optimizers for mobile devices.

Ann Oreshnikova

Marketing Director

With a Master's Degree in linguistics and a history of project leadership (both as a programmer and a marketer), Ann has been with JetBrains since the early days – back in the Spring of 2001, before the release of IntelliJ IDEA 2.0. Before joining the team, she worked in the diplomatic field for several years, and at STAR SPb (part of the international STAR AG Alliance) as a document writer, QA engineer, SW developer, and finally a project lead on a Rich Client Application in Java.
