

ReSharper 4.5 vs Plain Visual Studio 2008

Feature	Visual Studio 2008	ReSharper 4.5
Code Analysis		
On-the-fly error highlighting		
Solution-wide error highlighting		
Solution-wide warnings and suggestions		
Possible NullReferenceException analysis		
Code inspections		~750
Quick-fixes to resolve errors		~550
Annotated .NET Framework classes		
Namespace import pop-up		
Coding Assistance		
Code completion		
Smart completion (context-driven)		
Import symbol completion (completes types and extension methods from entire solution)		
Code snippets (templates)		
Generate file from template		
Generate type members		
Complete statement		
Rearrange code		
Navigation & Search		
Go to declaration		
Go to base type		
Go to inheritor		
Find references		
Go to reference		
Highlight references		
Go to type		
Go to file		
Go to symbol		
View recent files		
View recent edits		
Type hierarchy		
File structure	⁽¹⁾	
To-do browser (solution-wide)		
Stack trace explorer		

ReSharper 4.5 vs Plain Visual Studio 2008

Feature	Visual Studio 2008	ReSharper 4.5
Refactorings		
Solution-wide refactorings	7	35
Context actions		158
Code Cleanup		
Optimize using directives		
Remove code redundancies		
Organize type members		
Reformat code		
Code cleanup: performs all cleanup tasks in one go		
Unit Testing		
NUnit support		
MbUnit support		 (2)
xUnit.net support		 (3)
MSTest support		
Unit test explorer		
Multiple unit test sessions		
Profiler integration		

¹ Available via Source Code Outliner power toy

² Available via Gallio plugin

³ Available via xUnit.Net
