

Default keymap Windows/Linux and macOS

MOST USEFUL SHORTCUTS

Search everywhere	Double Shift	Double⇧
Basic code completion	Ctrl+Space	^Space
Show intention actions and quick-fixes	Alt+Enter	⌘↵
Run / Debug	Shift+F10 / Shift+F9	^R / ^D
Refactor this	Ctrl+Alt+Shift+T	^T
Go to declaration	Ctrl+B, Ctrl+Click	⌘B, ⌘Click
Multiple carets	Alt+Click	⌘Click

DON'T REMEMBER A SHORTCUT?

Find action	Ctrl+Shift+A	⇧⌘A
-------------	--------------	-----

EDITING

Parameter info	Ctrl+P	⌘P
Quick documentation lookup	Ctrl+Q	F1, ^J
Generate code	Alt+Insert	⌘N, ^⇧
Surround with	Ctrl+Alt+T	⌘⌘T
Insert live template	Ctrl+J	⌘J
Comment / uncomment with line comment	Ctrl+/ /	⌘/ /
Reformat code	Ctrl+Alt+L	⌘⌘L
Duplicate current line or selected block	Ctrl+D	⌘D
Delete line	Ctrl+Y	⌘⌘
Move line up	Alt+Shift+Up	⌘⇧↑
Move line down	Alt+Shift+Down	⌘⇧↓
Delete to word start	Ctrl+Backspace	⌘⌘
Delete to word end	Ctrl+Delete	⌘⌘
Close active editor tab	Ctrl+F4	⌘W

MULTIPLE CARETS AND SELECTIONS

Select all occurrences	Shift+Ctrl+Alt+J	⌘^G
Select next / unselect occurrence	Alt+J / Alt+Shift+J	^G / ⇧^G
Unselect all occurrences or carets	Esc	⌘

REFACTORING

Rename	Shift+F6	⇧F6
Safe delete	Alt+Delete	⌘⌘
Inline variable	Ctrl+Alt+N	⌘⌘N
Extract Variable	Ctrl+Alt+V	⌘⌘V
Extract Constant	Ctrl+Alt+C	⌘⌘C

NAVIGATION

Go to class	Ctrl+N	⌘O
Go to file	Ctrl+Shift+N	⌘⇧O
Go to symbol	Ctrl+Alt+Shift+N	⌘⌘O
Go to type declaration	Ctrl+Shift+B	⇧⇧B
Go to super-method / super-class	Ctrl+U	⌘U
View recent files	Ctrl+E	⌘E
Go to previous editor tab	Alt+Left	⌘⇧[
Go to next editor tab	Alt+Right	⌘⇧]
Quick definition	Ctrl+Shift+I	⌘⇧Space, ⌘Y
Navigate to last edit location	Ctrl+Shift+Backspace	⌘⇧⌘
Navigate to previous highlighted error	Shift+F2	⇧F2
Navigate to next highlighted error	F2	F2

SEARCH

Find	Ctrl+F	⌘F
Find in path	Ctrl+Shift+F	⌘⇧F
Find usages	Alt+F7	⌘F7
Find usages in file	Ctrl+F7	⌘F7

RUNNING AND DEBUGGING

Select configuration and run	Alt+Shift+F10	⇧⌘R
Select configuration and debug	Alt+Shift+F9	⇧⌘D
Rerun tests	Alt+Shift+R	⌘^R
Run Gulp / Grunt / npm task	Alt+F11	⌘F11
Step over / into	F8 / F7	F8 / F7
Step out	Shift+F8	⇧F8
Evaluate expression	Alt+F8	⌘F8
Resume	F9	⌘⌘R
Toggle breakpoint	Ctrl+F8	⌘F8

VCS AND LOCAL HISTORY

VCS operations popup	Alt+BackQuote(`)	⇧V
Commit to VCS	Ctrl+K	⌘K
View recent changes	Alt+Shift+C	⌘⇧C

The Smartest
JavaScript IDE

WS
I

WebStorm

JavaScript development made easy

Why WebStorm?

Enjoy productive coding

Get straight to coding with everything you need for JavaScript development available out of the box. Stay productive and focus on more creative tasks while WebStorm takes care of all the routine work for you.

Be confident in the results of your work

Write code that is more reliable and easier to maintain, with the IDE running dozens of code inspections as you type and promptly detecting potential problems. Refactor your entire codebase in a few clicks and make sure nothing is overlooked when implementing large structural changes.

Reduce the stress of complex tasks

Afraid of messing something up with Git and losing important changes? Or breaking something when renaming a component across your entire project? WebStorm will simplify these and other challenging tasks so you can focus on the big picture.

Features

Specialized in JavaScript

Looking for a tool you can trust for even the trickiest parts of your JavaScript development? That's what WebStorm is for. For over ten years we've been refining it to make coding a more enjoyable and productive experience. Whether you work with JavaScript, TypeScript, React, Vue, Angular, Node.js, HTML, or style sheets, WebStorm will have something for you.

The smartest editor

WebStorm deeply understands your project structure and can assist you with every aspect of writing code. It will autocomplete your code, detect and suggest fixes for errors and redundancies, and help you refactor code safely.

Built-in developer tools

One of the best parts of working in an IDE is that all of your essential tools are available in one place. Use WebStorm to debug and test your client-side and Node.js apps as well as to work with version control. Take advantage of the linters, build tools, terminal, and HTTP client, which are all integrated with the IDE.

Fast navigation and search

Move through your code faster, regardless of how large your projects are. Look for files, classes, or symbols, and review all the matches in one place.

Efficient teamwork

Onboard new teammates faster with all the key functionality prepackaged. Code together in real time and talk to others right from the IDE. Share your project configuration, including code style settings, and work efficiently with Git and GitHub.

Customizable environment

Want to extend the built-in functionality? Tailor WebStorm's look and feel to your liking by experimenting with things like themes and plugins.

Subscription pricing

	Yearly	Monthly
Businesses	\$129	\$12.90
Individuals	\$59	\$5.90

After the 1st year **20% OFF**

After the 2nd year **40% OFF**

Students and teachers, OS projects, user groups **FREE**
