

Accessing the CVS Roots Dialog Box

You can access the CVS Roots dialog box in several ways, depending on the general task you are currently performing.

To open the CVS roots dialog box, do one of the following:

- When [checking out](#) files or directories from a CVS repository: on the main menu, choose **VCS | Checkout from Version Control | CVS** and in the dialog box that opens click the **Configure** button.
- When [importing](#) files or directories to a CVS repository: on the main menu, choose **VCS | Import into CVS** and in the dialog box that opens click the **Configure** button.
- **When defining a CVS root to use in the future:** open a file which is already under CVS control and choose **VCS | CVS | Configure CVS Roots** on the main menu.
