

Add / Edit Pattern Dialog

File | Settings | IDE Settings | TODO - Add/Edit Pattern

Use this dialog box to define patterns that help track TODO items in your source code. Make sure the TODO items in the source code are inserted inside comments that are valid for the supported file types.

Item	Description
Pattern	In this text box, type the regular expression that describes the desired TODO pattern.
Icon	From this drop-down list, choose an icon for the pattern.
Case sensitive	Select this check-box to make the pattern case-sensitive.
Font type	Select the corresponding check box to have the icon text displayed in bold or italic.
Foreground	Select this check box to enable the palette and choose the foreground color.
Background	Select this check box to enable the palette and choose the background color.
Error Stripe Mark	Select this check box to enable the palette and choose the error stripe color.
Effects	Select this check box to enable effects (underscore, strikethrough, etc.) and choose the color for them from the palette.
