

# Android-Gradle Page

Use this page to specify settings for your **Android Module**.

Item	Description
Package name	Specify the package name for your application. Note that it's a Java package name that is specified here. For more information, see, for example, <a href="#">Android package name</a> and <a href="#">Naming a package</a> .
Minimum required SDK	From this drop-down list, select the Android SDK level that is required for your application to run. By default, the minimum required SDK level is Android 2.1.
Target SDK	From this drop-down list, select the target Android SDK. By default, the target SDK level is Android 4.3.
Compile with	This is a read-only field.
Theme	From this drop-down list, select a theme to apply to your module.
Create custom launcher icon	Select this check box to create a custom launcher icon. By default, this check box is selected.
Create activity	Select this check box to create an Android <a href="#">activity</a> . By default, this check box is selected.
Mark this project as a library	Select this check box to create an Android library project.
Support Mode	Use this area to set a mode for your module. You can select from the following options: <ul style="list-style-type: none"><li>■ <b>GridLayout</b> - select this check box if you plan to use a new GridLayout and need the support library.</li><li>■ <b>Fragments</b> - select this check box if you plan to use fragments and need the support library.</li><li>■ <b>Navigator Drawer</b> - select this check box if you plan to use a navigator drawer and need the support library.</li><li>■ <b>Action Bar</b> - select this check box if you plan to use an action bar and need the support library.</li></ul>
Description	This read-only field shows a quick information regarding each specified item.
