

Artifacts to Deploy Dialog

This dialog lets you manage the list of deployment [artifacts](#) for an application server [run/debug configuration](#).

Shown under **Available** and **Chosen** are the artifacts defined in your [project](#). By moving the artifacts between the panes, you compose the list of the artifacts to be deployed on the corresponding application server. (Under **Chosen**, the artifacts selected for deployment are shown.)

Item	Description
Add	Click this button to move the artifacts selected in the Available pane to the Chosen pane.
Remove	Click this button to move the artifacts selected in the Chosen pane to the Available pane.
Add all	Click this button to move all the artifacts to the Chosen pane.
Remove all	Click this button to remove all the artifacts from the Chosen pane.
