

## Associating Maven Goals with Keyboard Shortcuts

---

You can associate a Maven goal with a keyboard shortcut and execute commonly-used goals with a single key-stroke. In a Maven project, its goals appear under the **Maven goals** node in the [Keymap](#) dialog.

### To associate a keyboard shortcut with a maven goal

1. In the [Maven Projects tool window](#), right-click the desired goal.
2. On the context menu, choose **Assign Shortcut**. [Keymap](#) dialog appears.
3. Configure keymap, as described in the section [Configuring Keyboard Shortcuts](#).
