

# Bower

File | Settings | JavaScript | Bower

On this page, specify the location of the *Bower package manager* executable and configuration files and install, uninstall, or upgrade external tools through it.

Item	Description
Node.js interpreter	Specify here the location of the Node.js executable. Type the path manually, or choose it from the drop-down list if it was previously used, or click the <b>Browse</b> button  and choose the location in the dialog box that opens. See <a href="#">Node.js</a> for details.
Bower executable	In this field, specify the location of the Bower executable file ( <code>bower.cmd</code> or other depending on the operating system used). Type the path manually, or choose it from the drop-down list if it was previously used, or click the <b>Browse</b> button  and choose the location in the dialog box that opens.
bower.json	In this text bos, specify the location of the <a href="#">bower.json</a>  file. Type the path manually, or click the <b>Browse</b> button  and choose the location in the dialog box that opens.
Dependencies	<p>The area shows a list of all the tool-dependent packages that are currently installed on your computer.</p> <ul style="list-style-type: none"><li>■ <b>Package:</b> this read-only field shows the name of a package, exactly as it should be referenced if you were installing it in the command line mode.</li><li>■ <b>Version:</b> this read-only field shows the version of the package installed on your computer.</li><li>■ <b>Latest:</b> this read-only field shows the latest released version of the package. If a package is not up-to-date, it is marked with a blue arrow .</li><li>■ Click <b>+</b> to have a new package installed. In the <b>Available Packages</b> dialog box that opens, select the relevant package. Click <b>Install Package</b> when ready.</li><li>■ Click <b>-</b> to have the selected package removed.</li><li>■ Click <b>↑</b> to have the current version of the selected package replaced with the latest released version. The button is enabled only when the selected project is not up-to-date.</li></ul>
