

Change EJB Classes Dialog

EJB Tool Window | context menu of a bean | Jump to Source | Change EJB Classes

Use the dialog box to [change properties](#) of existing beans.

The contents of the dialog box are bean type-specific. See comments in the **Available in** column.

Item	Description	Available in
<ejb-name>	This read-only field shows the basic name used for generating the names of the EJB constituent classes. The rules for generating EJB names are configured in the Java EE Names dialog box.	All bean types
Package	In this text box, specify the fully qualified path to the package where the bean resides or click the Browse button  and select the desired package in the module tree.	All bean types
EJB Class	This read-only field shows the name of the bean implementation class.	All bean types
Message Listener	In this text box, specify the message listener interface. Type a fully qualified name or click the Browse button  and select the message listener interface from the list of available interfaces.	Message beans
Primary key class	In this text box, specify the class that will be used to access the primary key of the data source the entity bean is associated with.	Entity beans
CMP version	This read-only field shows the used CMP version.	Entity beans
	<div style="border: 1px solid gray; padding: 5px; margin: 5px 0;"> For BMP Entity beans, the field is read-only. </div>	
Remote Interface	Select this check box if you want to configure a remote client view of the bean. <div style="border: 1px solid gray; padding: 5px; margin: 5px 0;"> Selecting this check box enables the Home and Remote text boxes. </div>	Entity beans
Home	In this text box, specify the implementation class for a <i>remote home interface</i> . If necessary, click the Browse button  to open the Choose EJB Home Interface dialog box, where you can search for the desired interface by name or select it in the project tree.	Entity beans
Remote	In this text box, specify the implementation class for a <i>remote interface</i> . If necessary, click the Browse button  to open the Choose EJB Remote Interface dialog box, where you can search for the desired interface by name or select it in the project tree.	Entity beans

Item	Description	Available in
Local Interface	<p>Select this check box if you want to configure a local client view of the bean.</p> <div style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> <p>Selecting this check box enables the Local Home and Local text boxes.</p> </div>	Entity beans
Local Home	<p>In this text box, specify the implementation class for a <i>local home interface</i>. If necessary, click the Browse button  to open the Choose EJB Local Home Interface dialog box, where you can search for the desired interface by name or select it in the project tree.</p>	Entity beans
Local	<p>In this text box, specify the implementation class for a <i>local interface</i>. If necessary, click the Browse button  to open the Choose EJB Local Interface dialog box, where you can search for the desired interface by name or select it in the project tree.</p>	Entity beans
