

Choose Class

The dialog opens in various cases when you need to select a class that implements a specific element.

The dialog contains two tabs:

- [Search by Name](#)
- [Project](#)

Search by name tab

Use the tab to search a relevant class by specifying its name or part of the name.

Item	Description
Search pattern area	In this text field, type a part of the name of the relevant class.
Search results area	The area shows a list of the classes that meet the search pattern. The contents of the area change dynamically as you type.

Project tab

Use this tab to select the relevant class in the project tree.
