

# Clone Mercurial Repository Dialog

## Checkout from Version Control | Mercurial

Use the dialog box to set up a local repository by downloading the data from a remote repository.

Item	Description
Mercurial Repository URL	In this text box, type the URL of the remote repository which you want to clone.
Test	Click this button to check that connection to the remote repository has been established successfully.
Parent Directory	In this text box, specify the directory where you want IntelliJ IDEA to create a folder for your local Mercurial repository. Type the path manually or click the <b>Browse</b> button  and choose the desired directory in the <a href="#">dialog that opens</a> .
Directory Name	In this text box, type the name of the new folder into which the repository will be cloned. <div style="border: 1px solid orange; padding: 5px; margin-top: 10px;">The parent directory must not contain a folder with the specified name.</div>
Clone	Click this button to start cloning the specified repository.
