

# Clouds

---

File | Settings | IDE Settings | Clouds

Use this page to configure accounts in the supported clouds.

- [Toolbar](#)
- [CloudBees](#)
- [Cloud Foundry](#)
- [Google App Engine](#)
- [Heroku](#)
- [OpenShift](#)

## Toolbar

| Item | Description   |
|------|---|
| +    | Create a new account. Note that the list of suggested clouds <a href="#">depends on the enabled plugins</a> . |
| -    | Delete the selected account from the list.  |

## CloudBees

Refer to the [CloudBees documentation](#) for details.

| Item             | Description   |
|------------------|---|
| Name             | Enter the account name.   |
| Domain           | Enter the domain name.  |
| Username (email) | Enter your email.   |
| Password         | Enter your password.  |
| Test connection  | Click this button to make sure the credentials are entered correctly. |

## Cloud Foundry

Refer to the [Cloud Foundry documentation](#), and in particular to the [Cloud Foundry Glossary](#) for details.

| Item               | Description   |
|--------------------|---|
| Name               | Enter the account name.                               |
| Version            | Select the available version from the drop-down list. |
| Username (email)   | Enter your email.                                     |
| Password           | Enter your password.                                  |
| Provider (API URL) | Select the desired provider from the drop-down list.  |

| Item            | Description   |
|-----------------|---|
| Organization    | Select the desired organization name.                                 |
| Space           | Select the desired space name.  |
| Load            | Click this button to load the list of organizations and spaces.       |
| Test connection | Click this button to make sure the credentials are entered correctly. |

### Google App Engine

| Item             | Description   |
|------------------|---|
| Name             | Enter the account name.   |
| Username (email) | Enter your email.   |
| Test connection  | Click this button to make sure the credentials are entered correctly. |

### Heroku

Refer to the [Heroku documentation](#) for details.

| Item                  | Description   |
|-----------------------|---|
| Name                  | Enter the account name.   |
| Username (email)      | Enter your email.   |
| Password              | Enter your password.  |
| Upload public SSH key | Click this link to show the dialog box, where you have to specify the file that contains your public SSH key. |
| Test connection       | Click this button to make sure the credentials are entered correctly.   |

### OpenShift

Refer to the [OpenShift documentation](#) for details.

| Item                  | Description   |
|-----------------------|---|
| Name                  | Enter the account name.   |
| Username (email)      | Enter your email.   |
| Password              | Enter your password.  |
| Domain                | Enter the domain name.  |
| Upload public SSH key | Click this link to show the dialog box, where you have to specify the file that contains your public SSH key. |

| Item            | Description   |
|-----------------|---|
| Test connection | Click this button to make sure the credentials are entered correctly. |
