Tabs and Indents

Item	Description
Use tab character	- If this check box is selected, tab characters are used: - On pressing the `Tab` key - For indentation - For code reformatting - When the check box is cleared, IntelliJ IDEA uses spaces instead of tabs.
Smart tabs	- If this check box is selected, IntelliJ IDEA inserts tabs for indentation and reformatting, but fine alignment to a necessary column is done *only* via spaces without replacing them with tabs. This is done in order to preserve visual representation of the source code, when the **Tab Size** is changed. - If this check box is cleared, only tabs are used. This means that a group of spaces that fits the specified tab size is automatically replaced with a tab, which may result in breaking fine alignment. The **Smart Tabs** check box is available if the **Use Tab Character** check box is selected.
Tab size	In this text box, specify the number of spaces included in a tab.
Indent	In this text box, specify the number of spaces (or tabs if the **Use Tab Character** check box is selected) to be inserted for each indent level.
Continuation indent	In this text box, specify the number of spaces (or tabs if the **Use Tab Character** check box is selected) to be inserted at the next line in case of a construct break.

Set From

Click this link to reveal the list of languages to be used as the base for the current language code style. So doing, only the settings that are applicable to the current language are taken. All the other settings are not affected.

This link appears in the upper-right corner of the language-specific code style page, when applicable.

Click **Reset** to discard changes and return to the initial set of code style settings.
