Configuring Menus and Toolbars

You can customize menu and toolbar command lists to regroup features or make your favorites easier to access.

To customize menus and toolbars

1. Open the IDE Settings and click Menus and Toolbars. Alternatively, right-click the main toolbar, and choose **Customize Menus and Toolbars** on the context menu.

2. In the list of available menus and bars, expand the node you want to customize and select the desired item.

3. Customize the list of items in the selected menu or bar using the buttons on the right from the list:

   ▪ To add a new command, select the desired location in the list and click the **Add After** button. In the Choose Action To Add dialog box that opens, select the desired action.

   Optionally associate the action with an icon using the **Icon Path** text box. In this text box, specify the location of the file with the icon you want to assign to the selected action. If necessary, use the **Browse** button ⸬ to select the file in the corresponding dialog.

   > ▪ The image file should have `.png` extension.
   >
   > ▪ The size of the toolbar icons should be 16x16.

   ▪ To change the icon associated with a command, select the desired command in the list and click the **Edit Action Icon** button. In the **Choose Actions Icon Path** dialog box that opens, specify the location of the desired image. If necessary, use the **Browse** button ⸬ to select the image in the corresponding dialog.

   ▪ To delete an item from the list, select it and click the **Remove** button.

   ▪ To have logical groups of commands separated from each other by a separator, select the desired location in the list and click the **Add Separator** button.

   ▪ To change the order in which commands appear in the selected menu or on the selected bar, use the **Move Up** and **Move Down** buttons.

4. To abandon the changes and return to the default settings, click the **Restore Default** button.
