

# Create New Constructor

UML Class diagram - Context menu of a node element | New | Constructor

Alt+Insert

Item	Description
Parameters	
Type	Specify the parameter type. Note that <a href="#">code completion</a> works here. As you type, the suggestion list shrinks to show the matching options. Non-existent type is marked as a syntax error.
Name	Specify the parameter name.
Add/Remove	Use these buttons to add/remove parameters.
Move Up/Down	Use these buttons to reorder parameters by moving them up or down in the parameter list.
Visibility	Select one of the options to change visibility scope of the constructor.
Exceptions	
Add/Remove	Use these buttons to add/remove exceptions. For each new exception, specify its type. Note that <a href="#">code completion</a> works here. As you type, the suggestion list shrinks to show the matching options. Non-existent type is marked as a syntax error.
Move Up/Down	Use these buttons to reorder exceptions by moving them up or down in the list.
Signature Preview	This read-only area shows the draft constructor signature as you fill in the dialog fields.
