

Creating a project with a J2ME module

To develop a Java mobile application, you need a [project](#) with a [J2ME module](#).

To create a project with a J2ME module

1. If no project is currently open in IntelliJ IDEA, click **Create New Project** on the [Welcome screen](#). Otherwise, select **New Project** from the **File** menu.

As a result, the [New Project wizard](#) opens.

2. On the [first page of the wizard](#), in the left-hand pane, select **J2ME**.
3. If necessary, enable SQL support and select the SQL dialect to be used by default.
Click **Next**.
4. On the [next page of the wizard](#), specify mobile SDK-specific options, and click **Next**.
5. Specify the name and location settings for your project and module. For more information, see [Project Name and Location](#).

Click **Finish**.
