

Customizing IDEtalk Options

The user preferences are configurable in the IDEtalk Options dialog.

To customize IDEtalk options

1. Expand the IDEtalk tool window, click Settings icon on the toolbar: 
2. Select **More Options**. The [IDETalk Options dialog](#) opens.
3. Set the options as desired. Click **Apply** to save changes and continue working in the dialog. Click **OK** to save change and close the dialog.
