

Defining a JDK and a mobile SDK in IntelliJ IDEA

To be able to develop Java mobile applications, you should define the JDK and the Java mobile toolkit that you are going to use in IntelliJ IDEA.

To define a JDK and a mobile SDK in IntelliJ IDEA

1. [Open the Project Structure dialog](#) (e.g. Ctrl+Shift+Alt+S).
2. In the leftmost pane, under **Platform Settings**, click **SDKs**.
3. Above the pane to the right, click **+** and select **JDK**.
4. In the [dialog that opens](#), select the installation directory of the JDK to be used and click **OK**.
5. Click **+** and select **Mobile SDK**.
6. In the [dialog that opens](#), select the installation directory of your Java mobile toolkit (WTK or DoJa) and click **OK**.
7. If necessary, configure your custom profile and specify the preverify options on the [SDK page](#) (in the right-hand part of the dialog).
8. Click **OK** in the **Project Structure** dialog.
