

Defining the Validation File Set

After you have enabled the Struts 2 support, IntelliJ IDEA provides the ability to define the validation list by [adding](#), [editing](#), and [removing file sets](#).

To add a file set

1. Open the [Struts 2 Facet page](#) as for [changing the facet settings](#).
2. Switch to the [File Sets](#) tab.
3. Click **+** (Alt+Insert). The [Edit File Set dialog](#) opens showing the module tree.
4. In the **File Set Name** field, specify the name of the new file set.
5. To add a file to the set, select the check box next to its name.
6. To add a file that is not displayed in the tree, click **Locate** and select the the required files in the [Select Path dialog](#).

To edit a file set

1. Select the file set on the **File Sets** tab and click **↵** (Enter). The **Edit File Set dialog** opens.
2. To add files to the file set, select the check boxes next the required files and click **OK**.
3. To remove a file, select the file and click **⌫** (Alt+Delete).

To remove a file set

- Select the file set on the **File Sets** tab and click **⌫** (Alt+Delete).
