

Diagrams

File | Settings | IDE Settings | Diagrams

Use this page to configure the default visibility settings and layout for diagrams.

On this page:

- [Content pane](#)
- [Controls](#)

Content pane

Select the check boxes next to the elements to be shown on diagrams.

Item	Description
Show Difference	
Details	If this check box is selected, all the specified details of the elements will be shown in the UML class diagram for a revision. If this check box is not selected, only node elements will be included in diagram.
Java Class Diagrams	
Class Elements	Select the check boxes below to show members (fields, constructors, methods, properties and inner classes) within the node elements:  In diagram, use toolbar buttons  ,  ,  ,  , and  .
Dependencies	Select the check boxes below to show dependency links in diagram.
DB Diagrams	
Key Columns	If this check box is selected, the PK columns will be shown in the table node elements. In diagram, use the  toolbar button.
Columns	If this check box is selected, the columns will be shown in the table node elements. In diagram, use the  toolbar button.
Project Modules	
Libraries	If this check box is selected, libraries will be shown in UML diagrams for modules.
ActionScript/Flex	
Class Elements	Select the check boxes below to show members (fields, constructors, methods, and properties) within the node elements. In diagram, use toolbar buttons  ,  ,  , and  .

More nodes appear in this pane depending on the installed and enabled plugins.

Controls

Item	Description
Default layout	Select the desired layout from the drop-down list. Node elements in newly created diagrams will be arranged according to the selected layout.
Default scope	Select scope from the drop-down list. Specifying a scope helps you avoid showing in diagram the unnecessary hierarchies. You can define scopes for your project in the Scopes page of the Settings dialog.
Fit content after layout	If this check box is selected, then after applying a layout selected on the diagram context menu, all diagram elements will be resized to fit into the current diagram area. In diagram, use the  toolbar button.
Do relayout when new elements were added	If this check box is selected, diagram layout will be performed automatically after adding new elements.
Enable colors	If this check box is selected, relationship links will be shown colored.
