

Edit Android Platform Dialog

The dialog box opens when you select an Android platform in the [New Project From Scratch. Android](#) page or in the [Android Facet](#) page for a module and click the **Edit** button.

In this dialog box, update Android platform configurations that determine the Android SDKs to use in development and the target platforms to build applications against.

Item	Description
Name	In this text box, specify the name of the platform configuration.
SDK Path	In this text box, specify the location of the Android SDK to use. Type the path manually or click the Browse button  and select the SDK location in the dialog that opens .
Build Target	From this drop-down list, select the platform to build the application against.
