Java

Item	Description
Insert imports on paste	<p>Use this drop-down list to define how IntelliJ IDEA will insert imports for pasted blocks of code, if they contain references to classes that are not imported into the target class. The available options are:</p> <ul style="list-style-type: none">■ <i>All</i> - select this option to have IntelliJ IDEA automatically add import statements for all classes that are found in the pasted block of code and are not imported in the current class yet.■ <i>Ask</i> - if this option is selected, when pasting code blocks, IntelliJ IDEA will open a dialog box, where you can choose the desired imports.■ <i>None</i> - select this option to suppress import. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"><p>If you skip an import suggested in the <i>Ask</i> mode or choose the <i>None</i> mode, the non-imported classes will be red-highlighted and an import pop-up window will appear to help you create import statements using the Alt+Enter keyboard shortcut.</p></div>
Show import pop-up	Automatically display import pop-up dialog box when typing a name of the class that lacks import statement.
Optimize imports on the fly	Select this check box to have have the Optimize Imports operation automatically performed for your files.
Add unambiguous imports on the fly	Select this check box to have IntelliJ IDEA automatically add imports that can be added without user intervention.
Exclude from Import and Completion	<p>In this area, create a list of packages and classes that should not be automatically included in the import statements. Use:</p> <ul style="list-style-type: none">■ + (Alt+Insert) to open the Exclude Package dialog box, where you can specify a package or class to be excluded from import and completion.■ - (Alt+Delete) to remove the selected item from the list.

XML

Item	Description
Show import pop-up	Automatically display an import pop-up dialog box when typing the name of an unbound namespace.

Jsp

Item	Description
Add unambiguous imports on-the-fly	Select this check box to have IntelliJ IDEA automatically add imports that can be added without user intervention.

Php

Item	Description
Enable auto-import in file scope	Select this check box to have IntelliJ IDEA automatically import PHP namespaces, add <i>use</i> statements, and complete short class names on the fly when you are typing in a class or file that does not belong to any specific namespace. By default, the check box is cleared.
Enable auto-import in namespace scope	Select this check box to have IntelliJ IDEA automatically import PHP namespaces, add <i>use</i> statements, and complete short class names on the fly when you are typing in a class or file that belongs to a certain namespace. The check box is selected by default.
