

## EJB Module Editor - Transaction Attributes

---

EJB Tool Window | context menu of a module with an EJB facet | Jump to Source

---

Use this tab to manage the *transaction attributes* that are used by the EJB container to control the transaction scope when the enterprise bean methods are invoked.

Item	Description
Name	This column shows beans, their interfaces and the list of methods that they implement.
Transaction Attribute	This column displays the transaction attribute for a method, interface or bean. The possible values are: <ul style="list-style-type: none"><li>■ Mandatory</li><li>■ Never</li><li>■ NotSupported</li><li>■ Required</li><li>■ RequiresNew</li><li>■ Supports</li></ul>
