

Enabling Annotations

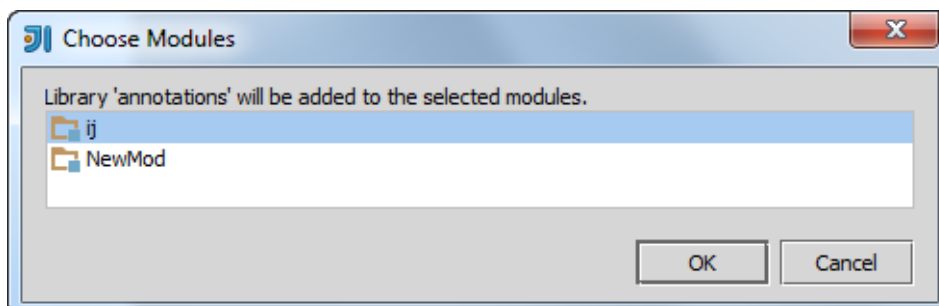

Prior to using annotations, they should be enabled in project.

To enable annotations in a project, follow these general steps

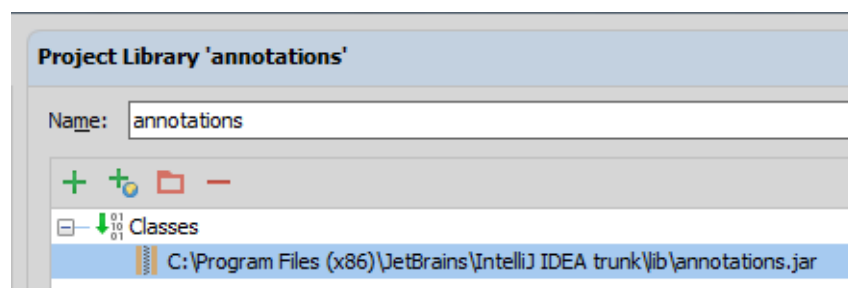

1. Click  to open the project structure dialog.
2. In the Project Structure dialog box, click **Libraries**.
3. Click **+**. **Select Library Files** dialog box opens.
4. Under that `<IntelliJ IDEA home>` directory, select `lib/annotation.jar`, and click **OK**:

5. If your project contains more than one module, choose the desired module to be modified, and click **OK**:

The new library is added to the classpath:
