

Enter Mouse Shortcut Dialog

File | Settings | IDE Settings | Keymap - Enter Mouse Shortcut

The dialog box opens when you select an action and click the **Add Mouse Shortcut** button. Use this dialog box to bind the selected action with a new mouse shortcut, which may be a single or a double clicking one of the mouse buttons or the wheel button.

The resulting mouse shortcut is marked with the  icon in the **Shortcuts** list.

Item	Description
Click Count	<p>In this area, specify the type of mouse click to be assigned to the selected action. The available options are:</p> <ul style="list-style-type: none">■ Single Click■ Double Click
Click Pad	<p>Click the desired mouse button anywhere in this area.</p> <div style="border: 1px solid #ccc; padding: 5px;"><p>The number of clicks in this area does not affect the shortcut configuration. No matter how many times you click a button, the click type chosen in the Click Count area will be assigned.</p></div>
Shortcut Preview	<p>This read-only field shows the newly defined shortcut.</p>
Conflicts	<p>This read-only field shows messages about conflicts that arise if a suggested mouse shortcut is already in use.</p> <div style="border: 1px solid #f96; padding: 5px;"><p>You can ignore a conflict and assign a shortcut to several actions. However it is strongly recommended that you avoid binding two actions with the same shortcut, because the priority of these actions is not defined.</p></div>
