

Evaluate Expression

Run | Evaluate Expression

Editor Context Menu | Evaluate Expression

Use this dialog box to calculate values of expressions or code fragments during the debugging session.

Item	Description
Expression	Use this field to edit the expression to be evaluated. If an expression is selected in the editor, this field displays selection. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;">This field is available in the Expression Mode.</div>
Language	Choose Java or Groovy from the drop-down list, to enable recognition of the respective syntax of expressions. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;">This field is available only for Groovy scripts.</div>
Statements to Evaluate	Type the group of statements to be evaluated. If a code fragment is selected in the editor, this field displays selection. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;">This field is available in the Code Fragment Mode.</div>
Result	Here the results are displayed.
Evaluate	Click this button to evaluate the current expression or code fragment.
Close	Click this button to close the dialog box.
Code Fragment Mode	Click this button to toggle to the Code Fragment Mode .
Expression Mode	Click this button to toggle to the Expression Mode .
