

## Find Usages. Variable Options

---

[Edit](#) | [Find](#) | [Find Usages](#)

This section describes Field, Variable, or Parameter usage search options in the **Find Usages** dialog.

Item	Description
Skip results tab with one usage	Select this check box to be navigated directly to the found usage without the <b>Find</b> tool window displayed, when only one usage is found.
Scope	In this area, specify the <a href="#">scope</a> of search. Select a pre-defined scope from the drop-down list or click the <b>Browse</b> button  to open the <a href="#">Scopes</a> dialog box, where you can define a custom scope.
Open in new tab	Select this check box have the results of each search shown in a separate tab of the <b>Find Results</b> window. If the check box is cleared, the search results will overwrite the contents of the current tab.
