

Finding Usages in the Current File

To find usages of a symbol in the current file

1. Click the desired symbol in the editor, or in the Structure view.
2. On the main menu, choose **Edit | Find | Find Usages in File**, or press **Ctrl+F7**. The encountered usage is highlighted in the editor.

For a field, you can specify whether you want to search for its accessor methods in the **Search Accessors** dialog box.
