

Generating Code

This section describes how to quickly and accurately populate your source code with the complicated code constructs.

In this part:

- [Creating Code Constructs by Live Templates](#)
- [Creating Code Constructs Using Surround Templates](#)
- [Examples of Using Live Templates](#)
- [Generating Constructors](#)
- [Generating Delegation Methods](#)
- [Generating Equals\(\) and GetHashCode\(\)](#)
- [Generating Getters and Setters](#)
- [Generating and Updating Copyright Notice](#)
- [Implementing Methods of an Interface](#)
- [Overriding Methods of a Superclass](#)
- [Rearranging Code Using Arrangement Rules](#)
- [Surrounding Blocks of Code with Language Constructs](#)
- [Unwrapping and Removing Statements](#)
- [Using Postfix Templates](#)
