

Grails Page

Use this page to select an existing Grails library or create a new [library](#) for Grails:

Item	Description
Use library	Select the Grails library to be used from the list (if the corresponding library is already defined in IntelliJ IDEA).
Create	If Grails is already installed on your computer, you create a Grails library and use that new library. To do that, click Create and select the Grails installation directory in the dialog that opens .
Configure	Click this button to edit the the selected library. (For an existing library the Edit Library dialog will open, for the library that you have just created - the Create Library dialog .)
