

Grails Procedures

This section covers Grails- and Griffon-specific procedures:

- [Creating Grails Application Elements](#)
- [Scaffolding](#)
- [Creating and Editing Relationships Between Domain Classes](#)
- [Creating Grails Views and Actions](#)
- [Navigating Between Actions and Views](#)
- [Running Grails Targets](#)
- [Running and Debugging Grails Applications](#)
- [Testing Grails Applications](#)
- [Working with Grails Plugins](#)
- [Dynamic Finders](#)

Note that Grails support is available in the Ultimate edition only.
