

## Groovy Page

---

Use this page to select an existing Groovy library or create a new [library](#) for Groovy:

Item	Description
Use library	Select the Groovy library to be used from the list (if the corresponding library is already defined in IntelliJ IDEA).
Create	If Groovy is already installed on your computer, you create a Groovy <a href="#">library</a> and use that new library. To do that, click <b>Create</b> and select the Groovy installation directory in the <a href="#">dialog that opens</a> .
Configure	Click this button to edit the the selected library. (For an existing library the <a href="#">Edit Library dialog</a> will open, for the library that you have just created - the <a href="#">Create Library dialog</a> .)
