

Import Existing Sources. Frameworks

If within the specified location IntelliJ IDEA finds the files that are indicators of certain frameworks and technologies, you can choose to enable support for these frameworks and technologies. To select the necessary frameworks and technologies, use the corresponding check boxes.

Frameworks and technologies in IntelliJ IDEA are represented by [facets](#).

Item	Description
Group by	<p>Specify how the files-indicators should be grouped:</p> <ul style="list-style-type: none"><li data-bbox="384 510 1385 645">■ Type. The files are grouped by frameworks and technologies. The files that belong to the same technology appear in the same group. Group names correspond to the names of the frameworks and technologies or, in IntelliJ IDEA terms, facet types (Web, JSF, Spring, etc.).<li data-bbox="384 667 1398 730">■ Directory. The files are grouped by their locations. The files located in the same directory appear in the same group.
