

Import Existing Sources. Project SDK

Specify the [SDK](#) to be used in your project .

If the necessary SDK is already defined in IntelliJ IDEA, select it in the pane under **+** and **-** (in the left-hand part of the page).

Otherwise, click **+** and select the [SDK type](#). Then, in the [dialog that opens](#), select the installation folder of the desired SDK. (By this time, the corresponding SDK must already be installed on your computer. If it isn't, download and install it first.)
