

Integrating Files and Changelists from the Changes Tool Window

You can integrate changelists or files into your local working copy directly from the **Changes** tool window.

To integrate a changelist or a file into your working copy, complete the following general steps

- In the **Changelists** pane, select the required changelist.

If necessary, you can select and integrate several changelists at a time.

- To integrate the entire changelist, click the **Integrate to Branch** button  on the **Merge Info** pane toolbar.
- To integrate a particular file from the selected changelist, select the file in the **Changed Files** pane and click the **Integrate to Branch** button  on the **Merge Info** pane toolbar.
- To revert the last integration of the selected changelist into the working copy, click the **Undo Integrate to Branch** button  on the toolbar.
