

IntelliJ IDEA Viewing Modes

In this section:

- [Toggling full screen mode](#)
- [Toggling presentation mode](#)

Toggling full screen mode

Besides [manipulating the tool windows](#) (show/hide or resize them), IntelliJ IDEA makes it possible to maximize the entire product window, hiding the main menu.

To enter full screen mode

- On the main menu, choose **View | Enter Full Screen**.

To exit full screen mode

1. Hover your mouse pointer over the top-most line to reveal the main menu.
2. On the main menu, choose **View | Exit Full Screen**.

Toggling presentation mode

In the presentation mode, the editor occupies the entire screen, while all the other IntelliJ IDEA components are hidden.

Besides that, the font size in this mode is larger than usual. You can define font size for the presentation mode in the [Appearance page](#) of the Settings dialog.

To enter presentation mode

- On the main menu, choose **View | Enter Presentation Mode**.

To exit presentation mode

1. Hover your mouse pointer over the top-most line of the editor to reveal the main menu.
2. On the main menu, choose **View | Exit Presentation Mode**.

Both actions are not mapped to any shortcuts by default. You can create your own shortcuts as described in the section [Configuring keyboard shortcuts](#).
