

Keyboard Shortcuts and Mouse Reference

Using shortcuts is a major way to maximum efficiency and productivity working with IntelliJ IDEA. This part lists keystroke combinations and their functions for the Default keymap defined in [Keymap](#) dialog box.

The key combinations documented in this part may fail to perform the function described, if you are using a [customized keymap](#).

To get a printable copy of the default keymap, choose **Help | Default Keymap Reference** on the main menu.

In this part:

- [Keyboard Shortcuts by Keystroke](#)
- [Keyboard Shortcuts by Category](#)
- [Mouse Reference](#)
