

Mark Resolved Dialog (Subversion)

VCS | Subversion | Mark Resolved

Project tool window | context menu of a file | Subversion | Mark Resolved

Local tab of Changes tool window | context menu of a file | Subversion | Mark Resolved

Project tool window | context menu of a file | Subversion | Mark Resolved

Version Control tool window - Merged with conflicts list | context menu of a file | Subversion | Mark Resolved

Use this dialog box to have IntelliJ IDEA consider conflicts in a file or directory resolved. This operation is most often required after merging text or property conflicts manually.

Item	Description
Files and directories	The list shows all the files and directories where merge or updated resulted in conflicts that IntelliJ IDEA cannot resolve automatically. When you have examined the conflicts resolved them manually or considered irrelevant, you need to tell IntelliJ IDEA that these files are no longer conflicting. To appoint a file for marking as free from conflicts, select the check box next to it.
Select All	Click this button to have all the items in the list appointed for marking as resolved.
Deselect All	Click this button to clear the list of candidates for marking as resolved.
Mark Resolved	Click this button to have IntelliJ IDEA treat all the selected items as conflict free. The dialog box closes, whereupon the Local tab of the Changes tool window shows the affected files as updated and available for submitting to the server.
