

Module Page

File | Project Structure | Modules

The **Module** page opens in the right-hand part of the [Project Structure dialog](#) when you select a module in the [element selector pane](#).

Use the **Name** field to edit the module name. Other settings are available on the following tabs:

- [Sources Tab](#)
- [Paths Tab](#)
- [Dependencies Tab](#)
- [Plugin Deployment Tab](#)
- [Mobile Module Settings Tab](#)
- [Mobile Build Settings Tab](#)
