

Monitor SOAP Messages Dialog

Tools | Web Services | Axis | Monitor SOAP Messages

Use this dialog box to monitor SOAP messages testing the client side of an Apache Axis Web service.

Item	Description
Web context name	Use this drop-down list to specify the context name of the server that is used for running the Web module on your local Tomcat session.
Port Name	Use this drop-down list to specify the port of the SOAP TCP monitor servlet, which is retrieved from <code>web.xml</code> descriptor settings.
