

# Move Members Dialog

---

Refactor | Move

F6

---

*Move Member* refactoring dialog box is invoked for static members selected in the Structure view, or in the editor.

Item	Description
Move members from	This read-only field displays the fully qualified name of the source class containing members to be moved.
To (fully qualified name)	Specify the fully qualified name of the target class.
Move as enum constant if possible	Select this option to move member as enum constant, if it is possible.
Members to be moved (static only)	This table shows all static members detected in the specified class. Select check boxes next to the members you want to move.
Visibility	Specify visibility level. You can either specify it explicitly, or select <b>Escalate</b> to automatically raise it to a necessary level.
