

# Moving Items Between Changelists in the Changes Tool Window

---

To move items between changelists in the changes tool window

1. In the [Changes](#) tool window, select one or more desired items in a changelist. Use the **Ctrl** and **Shift** keys for multiple selection.
2. Choose **Move to Another Changelist** on the context menu of the selection.

You can also use one of these alternatives:

- Click the **Move to Another Changelist** button  on the toolbar of the tool window.
  - Press **F6**.
  - Drag the selected items to the target changelist.
3. In the **Choose Changelist** dialog box, specify the changelist to move the selected items to:
    - If the target changelist exists, click the **Existing Changelist** option and select the desired changelist from the drop-down list.
    - To create a changelist, click the **New Changelist** option, type the name of the new changelist, and optionally provide a description.
