

Navigating from .Feature File to Step Definition

To navigate from a .feature file to step definition

1. Open the desired .feature file in the editor.
2. Do one of the following:
 - Keeping the **Ctrl** button pressed, hover your mouse pointer over a step. The step turns to a hyperlink, and its reference information is displayed at the tooltip:

Click the hyperlink. The step definition file opens in the editor, with the caret resting at the desired step definition.

- On the main menu, choose **Navigate | Declaration**.
- Press **Ctrl+B**, **Ctrl+Button1 Click** or **Button2 Click**.

You cannot navigate to a step definition file, if it resides outside a package under the test root.
