

Navigating to Next/Previous Change

If you edit a file that is under version control, IntelliJ IDEA provides several ways to move back and forth with the updates. In particular, you can use the navigation commands, keyboard shortcuts, and the change markers.

To navigate to the next/previous change in the editor

Do one of the following:

- On the main menu, choose **Navigate | Next / Previous Change**.
- Use keyboard shortcuts **Ctrl+Shift+Alt+Down** or **Ctrl+Shift+Alt+Up**.
- Point to a [change marker](#), and click the arrow up  or arrow down  buttons.
