

## Navigating to Recent File

---

In this section:

- [Navigating to a recently opened file](#)
- [Navigating to a recently edited file](#)
- [Navigating to the latest edit location](#)

### To navigate to a recently opened file

1. On the main menu, choose **View | Recent Files** or press **Ctrl+E**.
2. From the **Recent Files** pop-up window that opens select the desired file.

### To navigate to a recently edited file

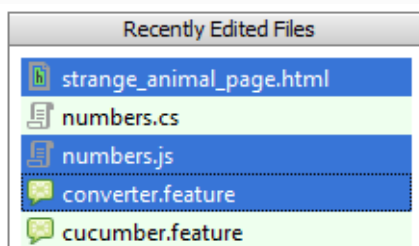

1. On the main menu, choose **View | Recently Changed Files** or press **Ctrl+Shift+E**.
2. From the **Recently Edited Files** pop-up window that opens select the desired file.

- The recently opened or recently modified files are selected from the history list. The number of entries in the history list is configurable in the **Recent file limit** field in the [Editor](#) settings page.
- Navigating to recent files applies to the search results as well. By pressing **Ctrl+E** in the [Find](#) tool window, you can have the list of recent search results shown.

### To jump to the latest edit location

- Do one of the following:
  - On the main menu, choose **Navigate | Last Edit Location**
  - Press **Ctrl+Shift+Backspace**.

Use multi-selection in the lists of recent files: **Ctrl** + mouse click for non-adjacent selection, or **Shift** + mouse click for adjacent selection:
