

## New Session Bean Dialog

---

EJB Tool Window | context menu of a module with an EJB facet | New - Session Bean

EJB Tool Window | context menu of a module with an EJB facet | Jump to Source | New - Session Bean

---

Use this dialog box to [create Session Beans](#).

Item	Description
<ejb-name>	In this text box, type the basic name to be used for generating the names of the EJB constituent classes. The rules for generating EJB names are configured in the <a href="#">Java EE Names</a> dialog box.
Package	In this text box, specify the fully qualified path to the package where the bean resides. If necessary, click the <b>Browse</b> button  and select the desired package in the project tree.
EJB Class	In this text box, specify the name of the bean implementation class. If necessary, click the <b>Browse</b> button  to open the <b>Choose EJB Class</b> dialog box, where you can search for the desired class by name or select it in the project tree.
