

# Notifications

File | Settings | IDE Settings | Notifications

Use this page to enable and disable notifications about certain events, change their presentation, and optionally enable their logging.

| Item                          | Description   |
|-------------------------------|---|
| Display balloon notifications | Select this check box to enable event notifications. (The notifications, generally, are shown in the balloons that appear on the screen when the corresponding events take place.)  |
| Group                         | This column lists groups of events that you may be notified of and/or that may be logged.   |
| Display                       | <p>If the <b>Display balloon notification</b> check box is selected, the settings in this column specify how the notifications for the corresponding group of events are shown.</p> <p>The available display options are:</p> <ul style="list-style-type: none"><li>■ <b>Balloon.</b> The balloons with the notification messages appear on the screen for a short period of time and then disappear automatically. The notifications are also shown in the Status bar, and added to the list of notifications.</li><li>■ <b>Sticky balloon.</b> The notification balloons stay on the screen unless you close them.</li><li>■ <b>Tool window balloon.</b> The notification balloons are shown only if an appropriate tool window is open.</li><li>■ <b>No pop-up.</b> The notifications for the corresponding group of events are not shown.</li></ul> |
| Log                           | If the check box for a group of events is selected, the corresponding events are logged and can be seen in the <a href="#">Event Log tool window</a> .  |
