

## Paths Tab

Use the **Paths** tab of the [Module page](#) to configure the compiler output paths for the module, and also to specify the locations of external JavaDocs and external annotations associated with the module.

- [Compiler output](#)
- [JavaDoc](#)
- [External Annotations](#)

### Compiler output

Item	Description
Inherit project compile output path	Select this option to use the <a href="#">paths specified for the project</a> .
Use module compile output path	Select this option if you want to set the compiler output paths for this module individually. Specify the associated settings: <ul style="list-style-type: none"><li>■ <b>Output path.</b> Specify the directory for the production classes. Use  (Shift+Enter) to select the directory in the <a href="#">Select Output Path dialog</a>.</li><li>■ <b>Test output path.</b> Specify the directory for the test classes. Use  (Shift+Enter) to select the directory in the <a href="#">Select Test Output Path dialog</a>.</li><li>■ <b>Exclude output paths.</b> Select this check box to make the output directories <a href="#">excluded</a>.</li></ul>

### JavaDoc

Use the available controls to compose the list of locations where external JavaDocs associated with the module are stored.

Icon	Shortcut	Description
	Alt+Insert	Use this icon or shortcut to add a JavaDoc file to the list.
	Alt+Delete	Use this icon or shortcut to remove the selected item from the list.
		Use this icon to add a URL of online JavaDoc.

### External Annotations

Use  and  to manage the list of locations (directories) for [external annotations](#) associated with the module.

Icon	Shortcut	Description
	Alt+Insert	Use this icon or shortcut to add a directory to the list.
	Alt+Delete	Use this icon or shortcut to remove the selected item from the list.
