

Plugins

File | Settings | IDE Settings | Plugins

The **Plugins** page shows the list of installed [plugins](#). Use the check boxes next to plugin names to enable or disable the plugins.

Other controls available on this page let you sort and filter the plugin list, update and uninstall [plugins](#) from the JetBrains and the other custom repositories, access [plugin repositories](#), and also install the plugins available locally.

Toolbar icons and context menu commands

Icon	Tooltip	Description
	Reload List of Plugins	Use this icon or command to update plugin statuses. This operation affects the statuses of the repository plugins only (see Colors for plugin statuses).
	Update Plugin	For repository plugins: use this icon or context menu command to download and install a newer version of the selected plugin (if available). See Colors for plugin statuses .
	Uninstall	For repository or JetBrains plugins: use this icon or context menu command to uninstall the selected plugin.
		Click this icon to have the list of plugins sorted by plugin statuses. Note that this icon is a toggle. When off, the plugins in the list are ordered alphabetically.
Show		Use this list to specify which plugins you want to see in the list. The option names are self-explanatory: <ul style="list-style-type: none">■ All plugins■ Enabled plugins■ Disabled plugins
		Type the string to be found. As you type, the list of plugins changes: only the plugins whose names and descriptions contain the specified string are shown. If you want IntelliJ IDEA to memorise the search string, press Enter. To bring the plugin list back to its initial state, delete the text in the search box or click  . To access the list of memorized search strings, click  .
Install JetBrains plugins		Click this button to open the Browse JetBrains Plugin dialog to download and install plugins from the JetBrains repository.

Icon	Tooltip	Description
Browse repositories		Click this button to open the Browse Repositories dialog to work with plugin repositories (to download and install repository plugins, manage enterprise plugin repositories, etc.).
Install plugin from disk		Click this button to install a plugin available locally. Select the file that implements the required plugin in the dialog that opens .

Colors for plugin statuses

Names of plugins with different statuses are shown in different colors.

Color	Plugin status
Black	A "normal" plugin status. For a repository plugin: the plugin version is up-to-date (there are no newer versions).
Red	One of the following: <ul style="list-style-type: none"> ■ The plugin is incompatible with the installed version of IntelliJ IDEA. ■ The plugin depends on another plugin which is disabled.
Blue	For a repository plugin: a newer version of the plugin is available.
Green	For a repository plugin: the plugin has been downloaded and installed, but has not been activated yet. (IntelliJ IDEA needs to be restarted.)
Gray	The plugin has been uninstalled, but the changes have not taken effect yet. (IntelliJ IDEA needs to be restarted.)
